### **2008 AIAEE Conference Poster and Professional Development Workshops**

Scholarly Activities Committee co-chair, Jim Hynes, solicited the calls for poster and professional development workshop abstract proposals, organized the review process for each, and was in charge of the poster session during the conference.

A total of 32 proposals were originally submitted for possible poster presentation at this year's conference. A panel of 20 agricultural and extension educators from 13 universities and agencies reviewed the proposals. Based on the panel's recommendation, 29 proposals were accepted for presentation at the 2008 AIAEE Conference.

Authors of professional paper proposals not accepted for presentation were asked to indicate if they were willing to be considered for participation in the poster session. Using the professional paper reviews as a foundation for acceptance, eight additional posters were accepted, totaling 37 posters altogether. Some of the presenters were unable to come to the conference. As a result of that, only 28 posters were presented.

There were eight professional development workshop proposals for possible presentation. A group of agricultural and extension educators from three universities reviewed the proposals and selected the one most applied and useful to the membership for the single time slot of the schedule. The conference planning committee coordinated the professional development workshop-planning process.
