Abstract
Building evaluation and accountability capacity of Extension systems is necessary for achieving the cost effectiveness of Extension programs and it has become a challenging educational and management task. How to undertake this Extension task is the focus of this poster presentation.

The purpose of this poster is to critically review needs and challenges and develop a framework for building evaluation and accountability capacity of Extension systems. The poster answers the following research questions:
1. How significant is building evaluation and accountability capacity of Extension systems in current socio-economic context?
2. Why is it important in international agricultural and Extension education?
3. What are the major challenges in building evaluation and accountability capacity of Extension systems?
4. How to construct the framework for building evaluation and accountability capacity of Extension systems?

This poster is a literature research study combined with the professional experience of the presenters.

Building evaluation and accountability capacity of Extension systems is an educational process and it should be planned and implemented systematically to achieve desired results. This poster is educationally significant because it presents an educational framework for building evaluation and accountability capacity of Extension systems.

Key Words: Extension, Evaluation, Accountability, Framework, Capacity
